Production Planning System
In Honor of Professor Rintaro Muramatsu
G. Salvendy 1
In Memoriam: Professor Rintaro Muramatsu, 1916-1994
R.W. Grubbström 3
Lot scheduling problem for continuous demand
Y. Seki and K. Kogure 7
A new concept of job shop scheduling system – hierarchical decision model
S. Tagawa 17
A study of production management system with MRP
D. Nakagiri and S. Kuriyama 27
Single machine scheduling using dominance relation to minimize earliness subject to ready and due times
M. Asano and H. Ohta 35
Fuzzy job shop scheduling
M. Kuroda and Zeng Wang 45
Replanning timing in hierarchical production planning
H. Tsubone and H. Furuta 53
On a two-stage hierarchical production planning system for process industries
H. Kalayama 63
The elements and functions of hierarchical scheduling system of order production
T. Ichimura 73
Ordering/Production System
Comparing integration strategies in production ordering systems
K. Takahashi and M. Soshiroda 83
Criterion for choosing ordering policies: Between fixed-size and fixed-interval, pull-type and push-type
K. Hoshino 91
Hybrid just-in-time logistics systems and information networks for effective management in perishable food industries
M. Iijima, S. Komatsu and S. Katoh 97
Comparative analysis of ordering models for an international co-operative global complementary production system
S. Hiraki 105
A production ordering system for two-item, two-stage, capacity-constraint production and inventory model
K. Ishii and S. Imori 119
Performance of a multistage hybrid push/pull production control system
Y. Hirakawa 129
Makespan comparison between resequencing and switching in a dynamic manufacturing environment
H. Matsuura and M. Kanezashi 137
Inventory Control System
An analytical comparison of inventory costs between the pull and the parts-oriented production systems
S. Miyazaki 151
Reserve production capacity in a production inventory system
B. Okubo 159
Perishable inventory control with two types of customers and different selling prices under the warehouse capacity constraint
H. Ishii and T. Nose 167

Vol. 44, No. 3

Modelling resource supply and demand: Expanding the utility of ABC
C. Salafatinos 177
The role of logistics in concurrent engineering
S. Dowlatshahi 189
A comment on Standish et al.: The problem with CALS: Barriers to the development of product data exchange and the US continuous acquisition and life-cycle support programme
G. Spinardi, I. Graham and R. Williams 201
The payback method of investment appraisal: A review and synthesis
F. Lefley 207
Efficient heuristic and optimal approaches for $n/2/F/\Sigma C_i$ scheduling problems
C. Wang C. Chu and J.-M. Proth 225
Inventory models for fast moving spare parts subject to "sudden death" obsolescence
K. Cobbaert and V. Oudheusden 239
Scheduling to minimize the coefficient of variation
P. De, J.B. Ghosh and C.E. Wells 249
Discounted costs, obsolescence and planned stockouts with the EOQ formula
C. van Delft and J.P. Vial 255
A two-item newsboy problem with substitutability
M. Khouja, A. Mehrez and G. Rabinowitz 267
Diary of Events 277
